

# SPIL GLASS SOFTWARE

Management

Optimisation

Shape Drawing

- On-premises / Cloud based platform
- Options to customise user interface
- Scalable to grow with your business
- Streamlines your sales and production
- Generates transparent operational data
- Ongoing software research & development
- Affordable start up and ongoing costs
- Investment recovery often within 30 days
- Remote access via smart phone or tablet

# To be competitive is essential for any business

This is especially the case for niche markets such as Glass fabrication companies. There are many challenges if one wants to stay ahead in the industry.

To maintain and grow a company's position in the market, the focus needs to be on three key elements that drive the industry. They are **quality, efficiency and productivity.** These three elements must complement each other to ensure continuing productivity at the highest level and smooth operation.

To maintain this complexity, SPIL Glass software is the ideal solution for any Glass fabrication business. This unique business management software has been especially designed for Glass fabrication and its complexities. SPIL Glass was designed to simply organise, manage, and control every step and element of your Glass fabrication business. From prospective customer to order entry, planning, production, optimisation, delivery and transferring records to the financial module, every detail of your Glass fabrication business is managed by SPIL Glass software leaving you time to focus on growing your business in the marketplace.

Not only does the SPIL Glass assist in quality, efficiency and productivity management, it also provides the tools for sales growth, reduces waste and alerts any critical errors as they occur within the business.

SPIL Glass software is a comprehensive yet simple to use application for all Glass fabrication businesses. It is an essential tool for your Glass Business if it is to have a competitive edge in this niche market. It will give you the freedom to focus on growing and developing your business.

#### The powerful, flexible and customisable SPIL Glass software has the following attributes:

- Provides greater process management
- Allows for multiple production stations,out
   work and WIP
- Manages and utilises inventory stocks
   efficiently
- Improves planning efficiency
- Reduces time and wastage
- Enables fast, efficient changes to production
- Integrates with your accounting system
- Generates powerful and comprehensive reports
- Fully integrated software system for your entire Glass business.

### **SPIL Glass Software Modules**

- My Desktop
- My alerts and notifications
- My Calendar
- Accounts Receivable (Debtors)
- Accounts Payable (Creditors)
- Inventory (Stocks)
- Credit Management
- Order entry
- Shape nesting
- Optimisation and planning
- Production
- Dispatch
- Glazing
- Job scheduler

- Fixed assets
- Employees
- Business Intelligence Centre
- User Administration

## SPIL Glass Software Integrated ERP System

Designed to address challenges faced by flat glass fabrication companies, SPIL Glass Software is a highly efficient ERP system. The comprehensive system has made glass fabrication quick and hassle-free for large to medium flat glass finishing companies around the world. It offers easy integration with your current systems to boost your operational productivity. SPIL Glass Software uses industry knowledge gained through decades of experience in order to create an advanced system that captures all your needs and enables you to deliver more. Our enterprise solution offers multi user functionality and scales from 1 to 1000 as per the business requirement.

# Functionality

- Streamline finishing processes across multiple sites and optimise resources.
- Implement effective cost control measures for higher operational efficiency and profits.
- Enhance customer satisfaction with highaccuracy custom glass finishing within specified timelines.
- Meet requisite industry standards for high precision finishing and comply with geographical regulations.
- Seamless interaction among departments to maximise productivity.

- Automate repetitive processes and cut down duplicate data entries.
- · Monitor quality to avoid waste and rejections.
- Get insights to improve operational processes and schedule machine maintenance in advance.
- Review machine consumption and analyze downtime to optimize performance.
- Generate process reports to evaluate actual and estimated costs.

# As per your requirements, you can choose the best version of our software:

#### **SPIL Glass ERP Pro**

Our on-premise ERP system is a client / server-based system built using advanced technology. We can integrate it with your existing networks to improve productivity without any delay. It can be accessed using your own infrastructure reducing the need for system upgrades and employee training. It runs optimally on the Windows platform and MSSQL database environment ranging from an Express version to an Enterprise version.

#### **SPIL Opti**

The SPIL Opti software is useful for easy cutting optimisation,stock management and minimises waste. Our feature-rich solution readily integrates with the most advanced cutting table machines in the market and is ideal for use in multi-user environments. Generate the best yield from your cutting batches and manage waste effortlessly.

#### **SPIL Glass Cloud**

Move your technical infrastructure to the cloud with SPIL Glass Cloud. It is the perfect software for small-scale glass fabrication organisations, glaziers, and installers.

Our low maintenance solution is highly efficient and affordable. Enriched with features like multifactor login authentication and remote accessibility from any platform, the SPIL Glass Cloud interface is highly intuitive and easy to navigate. The installation downtime is limited and can be done conveniently at your end with minimal steering by our team. To improve adoption rates, we also provide user guidance to shorten the learning curve of your employees. You can choose to run the version on your own hosting service and manage costs on your own.

#### Software uses

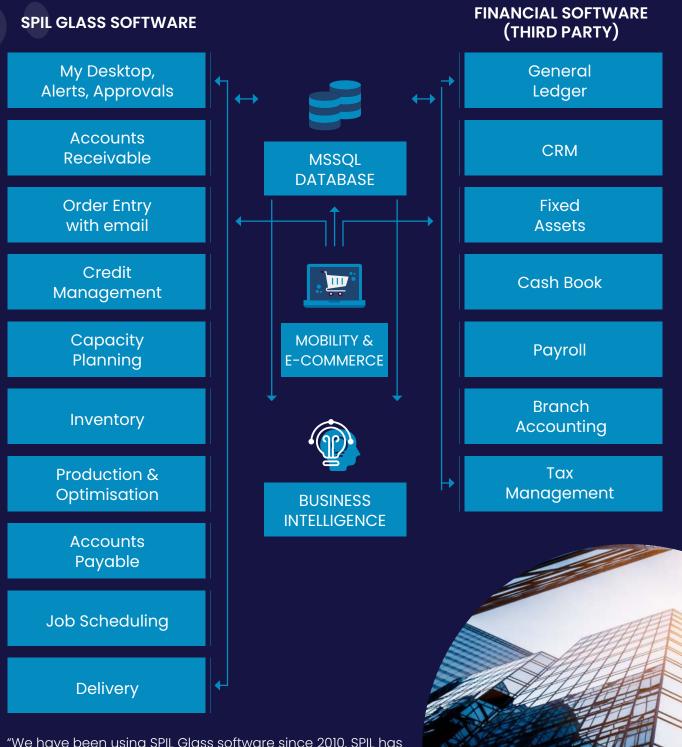

- CRM functionalities
- Quick Quotation Handling
- Automated Order Management
- Inventory Management
- Shape and Design Entry
- Stock Tracking (Barcode and Touchscreen)
- Capacity Planning

- Delivery Scheduling
- Production Management
- Fully Dynamic Glass Cutting Optimisation
- Dispatch Management
- Recut Management
- Waste Management
- Advanced Data Analytics

All SPIL solutions include smooth module integration with third-party applications including CAD solutions to aid in advanced digitisation, specialised scanners for defect detection, and tempering fragmentation tests.

We ease your business operations to deliver process control system integration through our progressive solutions. SPIL Glass Software Solutions can enhance the efficiency of your glass fabrication systems and make them fail-safe. Implementing our state-of-the-art solutions is simple as our experts are just a call away.

"We have been using SPIL Glass software since 2010. SPIL has improved our everyday production. Order entry is quick and easy. The ease of tracking glass at any stage in the factory through to loading for daily deliveries. Control of Inventory, with very informative reports. Customer inquiries are efficiently dealt with over the phone.

SPIL Software gave us the Glass software integration with our financial software too, that works well for us. We are very happy with SPIL Glass software and they are continually developing with us."

Steve Reynolds Chevron Glass - South Australia
